

MIT Sheets

Design Manual
Chapter 1
General Information
Originally Issued: 06-30-11

The MIT sheets provide wetland/stream mitigation information. These are provided by the Water Resources Section within the Office of Location and Environment.

Contents of the MIT Sheets

The MIT sheets contain tabulations, details, and plan and profile views of wetland/stream mitigation installations.

Plan Quality Checklist

- Are bid items included in Project Scheduling?
- If the quantities on the MIT sheets are included with the plan quantities in the C sheets, do the estimate reference notes reflect the wetland/stream mitigation installations?
- Does wetland/stream mitigation work conflict with proposed grading?
- Does each sheet contain a scale and north arrow?
